

Quick Start Guide

- 1 Scan Window
- 2 Scan Trigger
- 3 LED
- 4 Beeper

HS-360X Stand

Cable Attachment

1. Insert cable fully so connector is flush with scanner surface.
2. Loosen metal lock plate screws using a PH1 driver.
3. Slide lock plate to fully locked position.
4. Tighten screw using a PH1 driver (torque: 5 in-lb).

Return to Factory Defaults / Add an Enter Key

**Return to Factory Defaults**  
Scan the symbol below to return scanner parameters to factory defaults.

**Add an Enter Key (Carriage Return / Line Feed)**

Scan the symbol below to add an Enter key after scanned data.

Add a Tab Key

**Add a Tab Key**  
Scan the symbol below to add a Tab key after scanned data.

USB Caps Lock Override Options

USB - OVERRIDE CAPS LOCK KEY (ENABLE)

\*USB - DO NOT OVERRIDE CAPS LOCK KEY (DISABLE)

Step 1 – Set Up Host Interface

USB

Note: Cables may vary depending on configuration.

Scan one of the symbols below.

The interface cable automatically detects the host interface type and uses the default setting. If the default (\*) does not meet your requirements, scan the other host symbol below.

\*USB HID KEYBOARD EMULATION

SNAPI WITH IMAGING INTERFACE

USB CDC HOST (VIRTUAL COM)

Step 2 – Install WebLink<sub>PC</sub> and Connect

Install

- The WebLink<sub>PC</sub> installer is found at the following two locations:
- In the Download Center at: [www.microscan.com/downloadcenter](http://www.microscan.com/downloadcenter)
  - On the Omron Microscan Tools Drive: P/N 37-000010-01.
1. Download WebLink<sub>PC</sub> and follow the installation prompts.
  2. Double-click the WebLink<sub>PC</sub> icon to run the program.

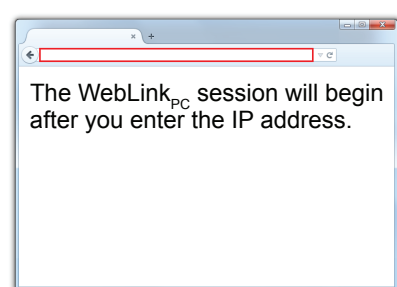

Minimum PC Requirements

- Intel® Core™2 Duo Processor (Core™i3 recommended)
- Microsoft Windows 7 32-bit (Windows 7 64-bit or Windows 10 recommended)
- Internet Explorer 11 or higher, Edge, Firefox, or Opera (Chrome recommended)
- 1 GB/128 MB Video RAM (2 GB RAM/128 MB Video RAM recommended)
- 100 MB hard drive space (500 MB recommended)
- 16-bit color display (32-bit recommended)
- 3.0 Windows Experience Index (4.0 recommended)

Connect

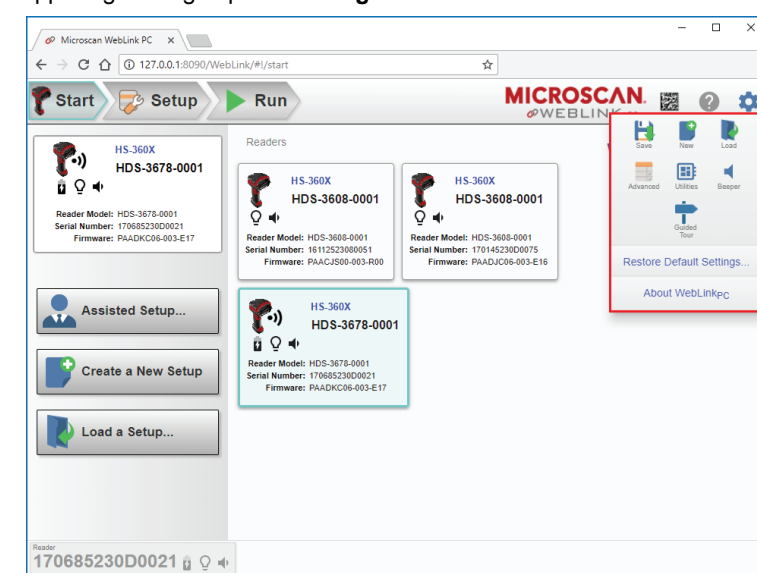

To start WebLink<sub>PC</sub>, double-click the icon placed on your desktop during installation.

You can also start WebLink<sub>PC</sub> by opening a browser of your choice and typing <http://localhost:8090> or <http://127.0.0.1:8090> in the address bar.

Step 3 – Explore the Start View

The **Start** view shows all the scanners available to the system. The **Reader Model**, **Serial Number**, and **Firmware Version** of each scanner are displayed. This view also allows you to choose **Assisted Setup**, **Create a New Setup**, or **Load a Setup**. The **Gear icon** in the upper right brings up the **Settings Menu**.

Step 4 – Create or Load a Setup

Assisted Setup

When you click the **Assisted Setup** button in the **Start** view, a dialog appears asking a series of application-related questions. Based on your answers, WebLink<sub>PC</sub> generates your initial setup automatically. Once the setup is created, you can fine-tune its parameters in the **Setup** view.

Create a New Setup

The **Start** view also allows you to create a **New Setup** without using **Assisted Setup**. When you click the **Create a New Setup** button, WebLink<sub>PC</sub> searches for any differences from default in the scanner parameters. If no differences from default are found, the **Setup** view appears. If differences from default are found, an alert appears asking if you want to restore default settings.

Load a Setup

Select **Load a Setup** to load an existing .ris WebLink<sub>PC</sub> setup file.

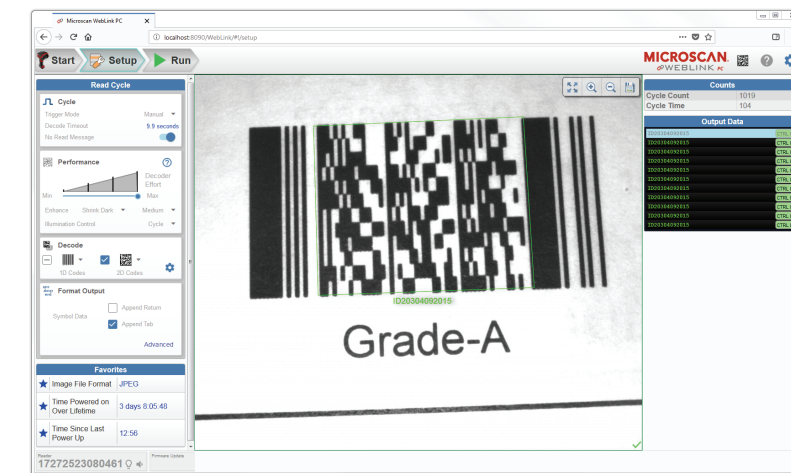

Step 5 – Explore the Setup View

The **Setup** view allows you to configure the scanner, view the current captured image, and view decoded symbol data.

The following read cycle steps are shown at the left side of the screen:

- Cycle
- Performance
- Decode
- Format Output

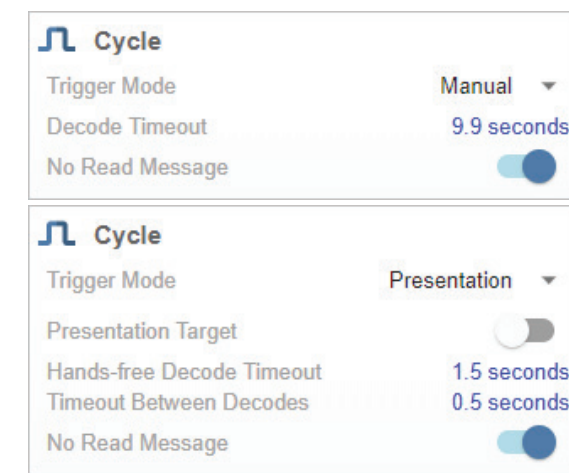

Step 6 – Configure the Scanner

Cycle Step

The **Cycle** step allows you to choose between **Manual** and **Presentation** trigger modes. In **Manual** mode, a decode is attempted when you pull the trigger. In **Presentation** mode, the read cycle begins when a symbol is detected moving into the scanner's field of view.

Note: The scanner is automatically set to **Presentation** mode when placed in the HS-360X Stand.

Step 6 – Configure the Scanner (Continued)

Performance Step (DPM Optimization)

The **Performance** step allows you to optimize the scanner for **Direct Part Mark (DPM)** decoding. A DPM is a permanent mark created by laser etch, chemical etch, or other method, directly on a substrate. DPMs are often harder to read than other symbols, and may require a few attempts before finding optimal settings. The **Decoder Effort** slider has four settings: **Level 1**, corresponding to **Min** on the slider; **Level 2**; **Level 3**; and **Level 4**, corresponding to **Max** on the slider. As **Decoder Effort** is moved toward **Max**, the decoder spends an increasing amount of time trying to decode the symbol.

In **Level 4**, you can also enable the **Enhance** option, which improves readability by allowing additional processing for poorly-formed marks. The **Illumination** options are **Direct**, **Indirect**, and **Cycle**.

Clicking the **Question Mark icon** brings up a dialog with more detail about each level of decoder effort.

Step 6 – Configure the Scanner (Continued)

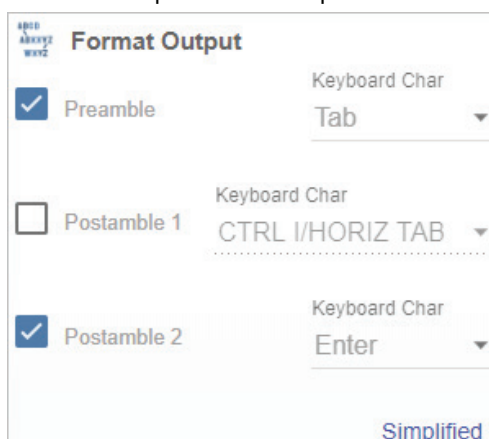

Decode Step

The **Decode** step allows you to select which symbologies to enable and disable. Clicking the **1D** and **2D** checkboxes will enable or disable all the symbologies in that group. The **Gear icon** brings up a **Symbology Settings** dialog, allowing you to modify specific parameters.

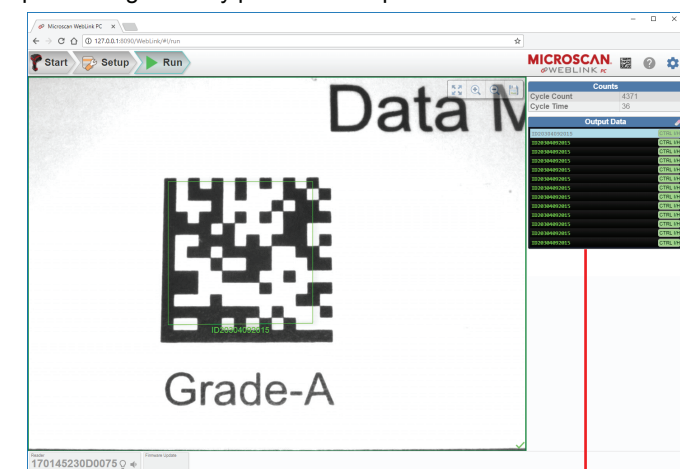

Format Output Step

**Format Output** allows you to configure preambles and postambles to add to symbol data output. The **Simplified** version of this control allows you to **Append Return** or **Append Tab** after each string of data output. The **Advanced** version allows you to choose from a wide variety of keyboard characters that can be output as a preamble or postamble. You can also add a second postamble if required.

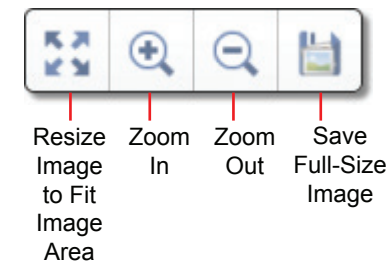

Step 7 – Run the Application

The **Run** view allows you to keep track of your application during runtime. The current captured image is shown along with a row of image control tools. A history of decoded symbol data is shown in the right pane along with any preambles or postambles that have been defined.

The **Output Data** display in the right pane shows a list of previous read cycle results. Each result is selectable and erasable.

Image control tools are available at the upper right of the image view.

# HS-360X Wired Handheld DPM Scanner

POST IN WORK AREA

## HS-360X Aiming

012345

For best results, aim the dot at the center of the symbol.

## Sample Symbols

Data Matrix  
OmronMicroscan1234567890

QR Code  
OmronMicroscan1234567890

Code 39  
OMRON1234

Interleaved 2 of 5  
1234567890

## RECOMMENDED USAGE GUIDE - OPTIMUM BODY POSTURE

### Avoid Extreme Wrist Angles

### Avoid Bending

### Avoid Reaching

## BEEPER INDICATIONS

Indication	Beeper Sequence
Power up	Low/medium/high beep
Barcode decoded	Medium beep
Transmission error detected; data is ignored	4 long low beeps
Successful parameter setting	High/low/high/low beep
Correct programming sequence performed	High/low beep
Incorrect programming sequence, or Cancel barcode scanned	Low/high beep

## LED INDICATIONS

Handheld Scanning	
Indication	LED Indicator
Scanner is on and ready to scan, or no power to scanner	Off
Barcode is successfully decoded	Green
Transmission error	Red
Hands-Free (Presentation) Scanning	
No power to scanner	Off
Scanner is ready to scan	Green
Barcode is successfully decoded	Off Momentarily
Transmission error	Red

## TROUBLESHOOTING

### Scanner not working

No power to scanner	Check system power.
Scanner is disabled	Ensure that correct host interface cable is used.

### Scanner decoding barcode, but data not transmitting to host

Host interface not configured properly	Scan appropriate host parameter barcodes.
Interface cable is loose	Ensure all cable connections are secure.
Invalid Rule	Program the correct rules.

### Scanner not decoding barcode

Scanner not programmed for barcode type	Ensure scanner is programmed to read type of barcode scanned.
Barcode unreadable	Ensure barcode is not defaced; try scanning test barcode of same barcode type.
Distance between scanner and barcode incorrect	Move scanner closer to, or further from barcode.

### Scanned data incorrectly displayed on host

Host interface not configured properly	Scan appropriate host parameter barcodes.
Region improperly configured	Select appropriate country and language encoding scheme.

TRUKISH WEEE Statement of Compliance  
 EEE Yönetmeliğine Uygundur

### Regulatory Information

This device is approved under Zebra Technologies Corporation.

This guide applies to Model Number: D53608. All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required. Local language translations are available at the following website: <http://www.zebra.com/support>

Any changes or modifications to Zebra equipment, not expressly approved by Zebra, could void the user's authority to operate the equipment.

### Health and Safety Recommendation

#### Ergonomic Recommendations

**Caution:** In order to avoid or minimize the potential risk of ergonomic injury follow the recommendations below. Consult with your local Health & Safety Manager to ensure that you are adhering to your company's safety programs to prevent employee injury.

- Reduce or eliminate repetitive motion
- Maintain a natural position
- Reduce or eliminate excessive force
- Keep objects that are used frequently within easy reach
- Perform tasks at correct heights
- Reduce or eliminate vibration
- Provide adjustable workstations
- Provide adequate clearance
- Provide a suitable working environment
- Improve work procedures.

### LED Compliance Statement:

Classified as "EXEMPT RISK GROUP" according to IEC 62471:2006 and EN 62471:2008.  
 Pulse Duration: Continuous

### Laser Devices

Class 2 laser scanners use a low power, visible light diode. As with any very bright light source, such as the sun, the user should avoid staring directly into the light beam. Momentary exposure to a Class 2 laser is not known to be harmful.

The following statement is required to comply with US and international regulations.

**Caution:** Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure.  
 Laser and LED light is emitted from this aperture:

### Power Supply

Use ONLY an Omron Microscan-approved UL-LISTED ITE (IEC/EN 60950-1, LPS/SELV) power supply with electrical ratings: Output 5 Vdc, min 0.2A, with a maximum ambient temperature of at least 50 degrees C. Use of alternative power supply will invalidate any approvals given to this unit and may be dangerous.  
 Note: The optional external power supply, P/N 98-9000181-01, is rated for use in a 40 degrees C maximum ambient temperature.

### Radio Frequency Interference Requirements - FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

### Radio Frequency Interference Requirements - Canada

CAN ICES-3 (B)/NMB-3(B).

### CE Marking and European Economic Area (EEA)

### Statement of Compliance

Zebra hereby declares that this device is in compliance with all applicable Directives, 2014/30/EU, 2014/35/EU and 2011/65/EU. The full text of the EU Declaration of Conformity is available at the following internet address: <http://www.zebra.com/doc>.

### Other Countries

#### Japan (VCCI) - Voluntary Control Council for Interference Class B ITE

この装置は、情報処理装置等電波障害自主規制協議会（VCCI）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。取扱説明書に従って正しい取り扱いをして下さい。

#### Korea Warning Statement for Class B ITE

기종별	사용자 안내
B급 기기 (가정용 방송통신기기)	이 기기는 가정용(B급)으로 전자파적합등록을 한 기기로서 주로 가정에서 사용하는 것을 목적으로 하며, 모든 지역에서 사용할 수 있습니다.

### Chile

Este equipo cumple con la Resolución No 403 de 2008, de la Subsecretaría de telecomunicaciones, relativa a radiación electromagnética.

### China

通过访问以下网址可下载当地语言支持的产品说明书  
[www.zebra.com/contact](http://www.zebra.com/contact)

### Thailand

เครื่องโทรคมนาคมและอุปกรณ์นี้ มีความสอดคล้องตามข้อกำหนดของ กทท.

### Ukraine

Дане обладнання відповідає вимогам технічного регламенту №1057, № 2008 на обмеження щодо використання деяких небезпечних речовин в електричних та електронних пристроях.

### China RoHS

This table was created to comply with China RoHS requirements.

部件名称 (Parts)	有害物质					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
金属部件 (Metal Parts)	X	0	0	0	0	0
电路模块 (Circuit Modules)	X	0	0	0	0	0
电缆及电缆组件 (Cables and Cable Assemblies)	0	0	0	0	0	0
塑料和聚合物部件 (Plastic and Polymeric Parts)	0	0	0	0	0	0
光学和光学组件 (Optics and Optical Components)	X	0	0	0	0	0
电池 (Batteries)	0	0	0	0	0	0

本表格依据SJ/T 11364 的规定编制。

0: 表示该有害物质在该部件所有均质材料中的含量均在 SJ/T 11364—2014 规定的限量要求以下。  
 X: 表示该有害物质至少在该部件的某一均质材料中的含量超出 SJ/T 11364—2014 规定的限量要求。(企业可在此处, 根据实际情况对上表中打“X”的技术原因进行进一步说明。)

This table was created to comply with China RoHS requirements.
